

EDUCATION AND SCHOLASTIC ACHIEVEMENTS				
Program		Institution	%/CGPA	Year
IDDD ^[1] in Data Science & B.Tech. in Biological Engineering		Indian Institute of Technology Madras	8.68/10	2025*
Intermediate (Class XI + XII)		MS Junior College, Hyderabad	94.9%	2020
Class X		International Indian School, Riyadh, KSA	10/10	2018
- Secured a rank in the top 1% in JEE Advanced and 99.125 percentile in JEE Mains 2020 among 12.5L+ candidates - Secured a rank of 303 in Kerala Engineering Architecture Medical Examination (KEAM) 2020 out of 70K+ candidates - Selected amongst the 75 students (out of 1000+) for Interdisciplinary Masters in Data Science Program in IIT Madras - Cleared National Defense Academy (NDA) common exam in the top 6K (out of 5.3L+ candidates) in the year 2020				
PROFESSIONAL EXPERIENCE				
Junior AI Engineer AWL, Japan	Development of Automated Pull Request Analysis Tool using Agentic Frameworks in GitHub			
	SWE-Agent	- Conducted extensive research on software engineering automation solutions using SWE-Bench - Implemented the SWE-Agent framework in GitHub Actions, creating custom commands and demos within the Agent-Computer Interface to improve LLM agent's understanding of the repo - Developed advanced features including reusable workflows and targeted repository navigation		
	Autogen	- Designed and deployed a multi-agent framework, Autogen, in GitHub within GitHub Actions - Created and integrated multiple agents and created tools with LLM^[2] Function Calling - Optimized the Autogen solution, achieving a 2x cost reduction compared to the SWE-Agent		
PROJECTS				
Low Light Object Detection and Classification (Kaggle Competition)		- Implemented night-time low illumination image enhancement techniques using OpenCV - Utilized YOLO v5 and YOLO v8 models for real-time object detection and classification - Applied data augmentation and implemented techniques to address unbalanced dataset - Achieved a mean Average Precision (mAP) score of 0.63, with a final ranking of 5th place		
Fetal Head Segmentation		- Developed U-Net & custom encoder-decoder CNN models for ultrasound images using PyTorch - Performed Data Augmentation; utilized dice and cross-entropy losses with learning rate schedule - Achieved high dice scores of 92.87% with the custom model and 94.86% with the U-Net model		
ML-Ops ^[3] for Fashion Detection		- Incorporated pipeline orchestration using Apache Airflow, managing task execution and workflow - Tracked model performance with MLFlow, for detailed experiment tracking and model evaluation - Created REST API endpoints and integrated Prometheus with a Grafana dashboard for analytics		
Customer Churn Analysis and Prediction		- Analyzed Telco Customer Churn dataset to predict the behavior of potential churn customers - Performed Data Cleaning, Outlier Analysis, Preprocessing and Explanatory Data Analysis - Implemented Decision Tree, Random Forest and XGBoost Classifiers for reliable prediction - Achieved 93% maximum test score from 80.1% after sampling due to imbalanced dataset		
Computational Economics		Modelling the interactions between supply chain entities using ACO algorithm - Developed a model for analyzing and optimizing interactions between multiple supply chains - Implemented the Ant Colony Optimization (ACO) algorithm, a nature-inspired optimization technique, to traverse the network and find the path with the minimum overall cost		
Sudoku Solver and Tic Tac Toe Game		- Developed a Sudoku Solver with HTML, CSS and JS using Recursive Backtracking algorithm - Developed a Tic Tac Toe game in C++ against the computer using the Minimax algorithm		
RELEVANT COURSEWORK				
Data Structures and Algorithms		Object Oriented Algorithms Implementation and Analysis	Foundations of Machine Learning	
Deep Learning for Image Processing		Mathematical Foundations of Data Science	Big Data Lab	
Linear Algebra for Engineers		Modern Computer Vision	Data Analytics Lab	
SKILLS				
Languages		Frameworks and Libraries	Software	
Python, C++, SQL, C, HTML, CSS, JavaScript		PyTorch, TensorFlow, Autogen, Git, NLTK, Scikit-learn, Numpy, Pandas, Matplotlib	Microsoft Office, AutoCAD	
POSITIONS OF RESPONSIBILITY				
Placement and Internship Coordinator		IDDD Placement and Internship team, IIT Madras		
		- Guided 6 companies through the placement processes and managed their entire logistics - Negotiated interviews slots and test slots with companies based on structured parameters		
Deputy Placement Coordinator		Biotechnology Placement and Internship team, IIT Madras		
		Assisted 5 companies with their placement processes by being the point of contact		
EXTRACURRICULARS				
Sports		- Secured Gold & Bronze among 16 teams in Football Schroeter & Deans Trophy tournament - Selected in a 50 member NSO fitness team from around 200+ applicants		
Student Mentor		Assisted 50+ students in comprehending diverse JEE concepts and addressed their doubts		
Teaching Assistant		Selected out of 100+ students; Evaluated assignment sets and engaged discussion forum
